

MDM-CON6

MusiCall Music & Message

MusiCall Music & Message

MDM-CON6

PoE zone controller

MusiCALL systems with Dante® are easily expandable, need an extra speaker? Plug it in where you want!

Networks can be expanded and reconfigured at any time with just a few clicks. If you compare a MusiCALL audio installation with a conventional audio system, it is striking how much fewer building blocks are needed to set up a complete system. Ease of installation is great for the installer.

The MDM-CON6 is a zone controller for MusiCall Music & Message systems. It can be used to choose from 4 sources, play/pause and set volume in a zone. The controller is powered with power over ethernet and uses LAN network to communicate with the server. It is compatible with 55x55mm frames like JUNG AS500 for instance.
